Professional Summary

4 years of Frontend Development experience in building scalable solutions that meet both technical and business requirements through collaboration with cross-functional teams.

Technologies

Languages: Java, JavaScript | **Web Development:** HTML, CSS, SCSS, TypeScript, Angular, React, NodeJS

CSS Framework: Bootstrap | **Testing:** Jasmine, Protractor | **Package Managers:** Npm, Yarn

UI Libraries: JQuery, Angular Material, Material UI | **Database:** MongoDB, SQL

Experience

Thermo Fisher Scientific

Bangalore, India

Software Engineer II

Dec 2021 – Present

- Built the Services Central platform from scratch, connecting 10,000+ ThermoFisher devices for enhancing support and customer service efficiency.
- Implemented interactive **Data visualizations using Chart.js**, enhancing data insight and user engagement.
- Developed a set of **reusable UI components**, ensuring consistent front-end standards across the organization and **reducing development time**.
- Prioritized and **managed technical debt** items, including upgrading Angular (from **version 11 to 18**), Angular Material, PrimeNG, and jQuery.
- Developed user facing features requiring consuming APIs, handling **large volume asynchronous data fetching**, and implementation of front-end patterns such as **lazy loading**.
- Implemented **RxJS to manage data streams** efficiently, event handling and state management.
- Led the implementation of unit test automation using Karma and Jasmine from scratch, driving **code coverage a minimum of 80%**.
- Configured and customized **Omniure (Adobe Analytics)** to **capture detailed user interactions and behavior** across the web application.
- Restricted duplicate comments by adding ticket-level comments using Git hooks, improving valid commit accuracy.

Cognizant

Chennai, India

Programmer Analyst Trainee

Jun 2021 – Nov 2021

- Worked on crud application as a demo project using Angular 11 and dotnet 5.

LectureNotes

Bhubaneswar, India

Associate Software Engineer

Dec 2020 – Jun 2021

- Successfully migrated Admin Panel codebase from **Vanilla JS and JQuery to React, Next Js** framework, resulting in improved code quality and performance
- Achieved **40% reduction in load times** and **30% reduction in bug reports** after migration
- Implemented new features and improved existing functionality, also analyzed and resolved critical bugs in collaboration with cross-functional teams.

Education

Synergy Institute Of Technology

Bhubaneswar, India

Bachelor of Technology, CSE

Aug 2016 – May 2020

Projects

Spectator App

github.com/Spectator 

- An online event management application created in React and Node.
- Implemented event listing, including filtering, search of events and responsive design optimizations.
